Community CCRx News

■ **Guidance to Pharmacies Submitting Lipitor Claims**

Lipitor® will continue to be covered on Tier 1 for all Community CCRx Medicare prescription drug plans. Atorvastatin (generic Lipitor) is currently not on the formulary, and claims for Atorvastatin will reject at the point of sale.

To process a claim for Lipitor, pharmacies are advised to submit the claim with **DAW 0**. In limited cases, the claim may reject, depending on the pharmacy system's pre-edit capabilities. In these instances, pharmacies should use another code such as **DAW 2** as a workaround. Both codes will result in the pharmacy receiving its contracted brand reimbursement rate.

■ **Community CCRx Patients to Receive New ID Cards for 2012**

As a result of Community CCRx's change to [CVS Caremark as its PBM](#) [or "claims processor"], patients who are currently enrolled in a Community CCRx Medicare Prescription Drug Plan will be receiving a new ID card to use beginning January 1, 2012.

It is important to note that the new ID cards will feature new information that pharmacies will need to input into their system in order for claims to process successfully in 2012.

The cards will feature new processing information. The new BIN/PCN/RxGroup for Community CCRx will be as follows:

- **BIN - 004336**
- **PCN - MEDDADV**
- **RxGroup - COMCCR**

Pharmacies that try to submit a 2012 claim using the current BIN and PCN will receive a rejection at the point of sale.

Current Community CCRx members will be receiving the new ID cards early, so patients may bring them into the pharmacy prior to the New Year. Please continue to submit 2011 claims to Medco, and do not use the new card until January 1.
